

XL PIPE

Pipe Wrap Bubble Foil Insulation

Prevents freezing pipes.
Protects skin against hot pipes.
Ideal low profile for pipes close together.
Dramatically reduces heat loss.
Quick & Easy to install.
Long lasting.
Save energy and Money.
Insulation for the DIY'er

Xcel Insulation's Pipe Wrap is easy to install, reflective aluminium foil bubble insulation. Designed specifically for pipes.

Our Pipe Wrap will ensure your outside pipes won't freeze during cold weather. Also helps protect skin contact with hot pipes. A low profile makes installation easy where the pipes are close together. Perfect for use on outside taps.

Simply wrap the pipe wrap around the pipe, cut to length with scissors and finish sealing both ends with aluminium tape. No special tools are required.

PIPE WRAP INSULATION

80mm x 7.5m

- SUITABLE FOR ANY PIPE DIAMETER
- QUICK AND EASY TO INSTALL
- PROTECTS PIPES FROM HOT & COLD TEMPERATURES
- SLIM PROFILE IDEAL FOR TIGHT SPACES

Ultra-low emissivity, reflective foil, provides a robust radiant barrier, preventing heat loss and protects pipes from both heat and cold. The internal bubble structure insulates and limits the transfer of heat. No more frozen pipes! Ensure no pipe is left exposed and secure both ends of the pipe insulation with aluminium foil tape.
